ENGINEERING YOUR SUCCESS.

Parker Hannifin

Parker Hannifin is one of the world's leading suppliers of products and solutions in Motion and Control. Using innovative product development and an acquisition strategy to increase our range of pneumatic products and solutions, we now have one of the broadest product offerings available in the market.

Our range now extends from the compressor to the point at which the air is used. This could be supplying power take off on

a vehicle, moving a cylinder or gripper to milking cows. The design and manufacture of bespoke integrated solutions for air, gas and fluid control is one of our core specialisation.

The Parker network of distributors is the most comprehensive in the world, which means our products are available from specialist pneumatic distributors wherever you are located.

In the following pages are listed the core first choice products from across Parker which are aimed at the pneumatic market. From valves, actuators and air preparation to push in fittings quick connectors and tubing to customized systems. In this catalogue you will find products from Pneumatic Division Europe, Legris, Rectus Tema, Fluid connectors, KV and Fluid Controls, presenting an unrivalled choice of products and solutions to suit virtually any application.

WARNING

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE. This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met. The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

SALE CONDITIONS

The items described in this document are available for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any sale contract entered into by Parker will be governed by the provisions stated in Parker's standard terms and conditions of sale (copy available upon request).

Fittings, Tubing and Couplers

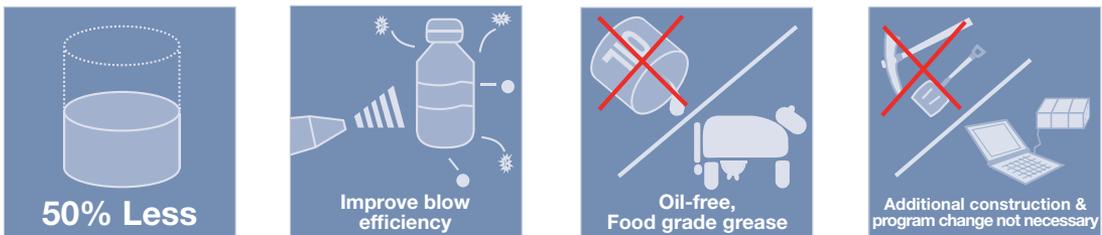

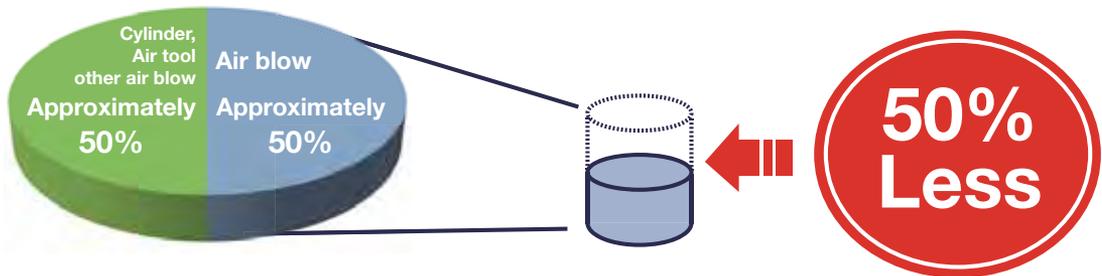

Legris Fittings and Tubing	CAT/0540/UK	106
Rectus Couplers	CAT3800-PNEU-GB	112

An easy solution to your environmental protection efforts!
The air saving unit contributes to power savings and CO2 reduction.

New

Air Saver Unit ASC/ASV Series

The air Saver Unit can reduce air consumption by up to 50% and improves blow efficiency in air blow applications.

Typical Savings*:
 (*100 off ASC500 Units 8 hours/day for 20 days)

	Without Air Saver	With Air Saver
Power Consumption	53,600kW/month	26,800kW/month
CO2 Discharge	17t	8.5t
Cost	7 164 €/month	3 618 €/month

Your estimated Air Saver Unit cost reduction per year = €42 890.52

When an air saver unit is used, several positive effects can be expected. Air blow accounts for almost 50% of all compressed air used in plants. The air saver unit with a switching valve technology for air blow. Can reduce air consumption by up to 50% !

- Large reductions in plant air consumption.
- Savings in compressor power consumption.
- Reduction in plant CO₂ emissions.
- Big contribution to energy-saving activities.

New

Actuators

Careful design and high quality manufacture throughout ensure long service life and optimum economy.

Mounting dimensions fully in accordance with ISO 6432 and CETOP RP52P greatly simplifies installation and world-wide interchangeability.

- Conforms to ISO 6432
- Available in 10 to 25 mm bores
- Corrosion resistant design and low weight construction
- Magnetic piston as standard
- End stroke buffers for long service life

Operating information

Working pressure: Max 10 bar
 Temperature range: -20°C to +80°C Ø10-25mm

Prelubricated, further lubrication is not normally necessary.
 If additional lubrication is introduced it must be continued.

Double acting buffer cushioning

Normally open	3 m PVC-cable without connector	P8S-GRFLX
Reed sensorer, 24-230 V AC/DC		
Normally open	3 m PVC-cable without connector	P8S-GRFLX2

Sensor mounting

Description	Weight kg	Order code
Sensor mounting for P1A cylinder bore Ø10 to Ø25 mm	0,07	P8S-TMC01

Connecting cables with one connector

The cables have an integral snap-in female connector.

Cables for sensors, complete with one female connector

Cable/connector	Order code
3 m, 8 mm Snap-in connector	9126344341
10 m, 8 mm Snap-in connector	9126344342

1) Without LED

Double acting with stainless steel piston rod

- Conforms to ISO 15552.
- Bore 32-125 mm.
- Double acting.
- Stainless steel piston rod.
- Robust design.
- Adjustable air cushioning.
- Retained stainless steel cushioning screws.
- Wide range of mountings and drop-in sensors

Operating information

Working pressure: Max 10 bar
Standard Temperature: -20°C to +80°C

10 m, 8 mm Snap-in connector	9126344342

1) Without LED

P1D-S series. This series is the ultimate in ISO pneumatic cylinders and is suitable for virtually any application. Options include the tie rod design, smooth profile, ultra clean cylinders for use in the food industry and all the variants illustrated on page 33 including through rod and piston rod locking versions.

- Available in 32 to 125 mm bores
- PUR seals for long service life
- Drop-in sensors
- Corrosion resistant design
- Magnetic piston as standard
- Lubricated with food grade grease

Sensor mounting

Description	Weight kg	Order code
Sensor mounting for P1D-T cylinder bore Ø160 to Ø320 mm	0,040	PD48956

Connecting cables with one connector

The cables have an integral snap-in female connector.

**Cables for sensors, complete with one female connector**

Cable/connector	Order code
3 m, 8 mm Snap-in connector	9126344341
10 m, 8 mm Snap-in connector	9126344342

1) Without LED

P1D-X High Temperature Cylinders

All seals in the high temperature version of P1D-X are developed and validated for continuous operation up to +150° C. The combination of the seal geometry and the FPM material (Viton) ensures reliable and long service life. Certain restrictions apply when choosing sensors due to the temperature range. High temperature cylinders have no magnetic piston and cannot be fitted with sensors (the magnetic field strength in high temperatures is too low to ensure correct reliable sensor function).

Operating information

Working pressure:	Max 10 bar
Working temperature:	
High temp. version	-10°C to +150°C

For more information see www.parker.com/euro_pneumatic

- Conforms to ISO 15552.
- Bore 32-125 mm.
- Double acting.
- Stainless steel piston rod.
- Adjustable air cushioning.
- Wide range of mountings.

P1D-X - High temperature (no magnetic)

P1D-X Low Temperature Cylinders

All seals in the low temperature version of P1D-X are developed and validated for continuous operation down to -40°C . Polyurethane PUR seal technology and specifically formulated grease support performance and reliability for low temperature applications. As standard supplied with a magnetic ring in the piston for proximity sensing but please note that the sensors are normally specified for full performance to -25°C only.

- Conforms to ISO 15552.
- Bore 32-125 mm.
- Double acting.
- Stainless steel piston rod.
- Adjustable air cushioning.
- Wide range of mountings and drop-in sensors.

Operating information

Working pressure:	Max 10 bar
Working temperature:

The cylinders are supplied complete with a zinc plated steel piston rod nut.

Double acting - Female threaded piston rod

The versatile range of Short Build Cylinders. Integral sensor grooves, suitable for a wide range of applications.

- Bore 20-100 mm with ISO 21287 conformity
- Double acting with female piston rod thread
- Ideal for applications where space is at a premium
- Corrosion resistant thanks to use of anodised aluminium and stainless steel
- Elastic cushioning facilitates high speeds and short cycle times.
- Flexible direct mounting with through holes and threads
- Wide range of mountings and drop-in sensors

Operating information

Working pressure: Max 10 bar
Permissible fluid: Air, with or without lubrication

Seals / Temperature options

Standard: -20°C to +80°C
High temperature: -10°C to +120°C
Low temperature: -40°C to +80°C

Prelubricated, further lubrication is not normally necessary. If additional lubrication is introduced it must be continued.

Double acting - Female threaded piston rod

Cable, Flex PVC	10 m, 8 mm Snap-in connector	0,21	9126344342

The P1Q compact cylinder is ideal for applications where you need compact dimensions and high overall performance. The versatile P1Q cylinder range provides a long trouble-free operation in a variety of applications.

- Bore 12-100 mm with ISO 15524 conformity
- Compact and versatile
- Magnetic or non magnetic options
- Flush fit sensor range
- Buffer cushioning as standard
- Piston wear ring on Ø32 - Ø100mm
- Tapped both ends as standard

Operating information

Working pressure: Max 10 bar
 Permissible fluid: Air, with or without lubrication
 Standard working temperature: -5°C to +60°C

Prelubricated, further lubrication is not normally necessary.
 If additional lubrication is introduced it must be continued.

Handling Products

Comprising an innovative range of Grippers, Rotary Tables, Slide Tables, Stop Cylinders, Compact Guided Cylinders and Shock Absorbers

Parker is about motion control engineering, manufacturing, application expertise and unparalleled customer service.

Parker products are everywhere — from laboratories, cleanrooms and factory floors, to mines, foundries and satellites in space — our products are used anywhere machines, processes and people depend on reliable high-performance motion control.

Today's industrial handling applications demand the best in quality and productivity. Likewise, high-technology applications demand performance in quality throughput and precision.

P5GA - Angular double acting, square jaw carriers

- Available with comprehensive range of bore sizes Ø12 - 32 mm.
- Highly accurate air driven device for holding work-piece.
- Magnetic as standard

Sensors

Check on closing and opening of gripper by means of sensors.

P5RS - Rotating Tables

The P5RS rotary table units provide precise control even under heavy loads, with specially designed load fixing and centring capabilities. End stroke cushioning using supplied adjusting bolts or optional shock absorbers offers dependable linear cushioning enabling objects to be carried and positioned safely and securely.

- Bores Ø16, 20, 25 and 32 mm
- Twin rack and pinion
- Adjustable between 0° and 190°
- Magnetic piston standard
- Stroke adjusters standard
- Available with shock absorbers
- Easy mounting of work piece

Operating Information

Pressure range:	1 to 9 bar
Temperature range:	-5° to 60° C
Filtration requirements:	
Air filtration	40 micron or better
Air lubrication	Not necessary*
Air humidity	Low moisture content (dry)

* Addition of lubrication will greatly increase service life

For more information see www.parker.com/euro_pneumatic

P5SS - Slide Tables

The Precision Slide Table P5SS is a pneumatic actuator, operated by two cylinders mounted in parallel for moving loads fitted on its mobile carriage or on its front plate quickly and accurately. Optional end of stroke adjusters offer precise adjustment even when the slide table is pressurised.

- High precision
- Bores Ø6, 8, 12, 16, 20 and 25mm
- Combination of dual bore cylinder and linear rail
- Magnetic piston standard
- Rubber bumper standard
- Optional stroke adjusters available
- Optional shock absorbers available

9109 & SP Air Bellows

Removable and Crimped Types

Air bellows are the ideal choice for applications requiring short stroke, high thrust single acting actuators. Manufactured from fabric reinforced synthetic rubber in one, two or three convolutions according to stroke and model. They incorporate no reciprocating metal parts and so provide virtually frictionless thrust compared with conventional pneumatic cylinders. All models are single acting only. The return stroke is provided in part by the natural spring action of the bellows but more usually by the load itself. The simplicity of construction provides an extremely long, virtually maintenance-free service life even under arduous conditions. Air bellows are suitable for vibration applications i.e. device feeders at high frequency.

- **10 sizes, diameters 70 to 660 mm, Strokes from 20 to 410 mm, single, double or triple convolutions (removable type)**
- **7 sizes, diameters 82 to 288 mm, Strokes from 55 to 170 mm, single or double convolutions (crimped type)**
- **High thrust and frictionless movement**
- **Oil free**
- **Short stroke for high force application**
- **Easy to install**
- **Easy to work**
- **Single acting**
- **Use as a cylinder or an isolator**

Stainless Steel Air Motors P1V-S

An ideal choice for the food grade applications, and in all other ATEX applications where there is a risk of corrosion.

Designed for demanding applications and available in a wide variety of speeds and output torques. The all round, dirt-trap free design, stainless steel construction and viton external seals makes them the ideal choice for the Food Industry, where washdown with aggressive cleaning agents is common.

- Power from 0,02 kW to 1,2 kW
- ATEX CE Ex approved from 0,12 kW to 1,2 kW
- Keyed or threaded shaft
- No-lube intermittent operation as standard
- 0,2 kW, 0,3 and 1.2 kW Brakemotors for higher safety
- 0,28, 0,57 and 0.86 kW high torque series

Robust air motors

P1V-M is a series of air motors, with or without planetary gearbox. They are made of casted iron and grey painted. Its robustness makes it suitable for all industrial air motor applications. They are ATEX certified to be used in critical environments. The range contains five different sizes with power ratings of 200, 400, 600, 900 and 1200 Watts. The motor and the gearbox are built to be extremely compact, making the motors suitable for applications requiring spaceless. The gearbox is of the planetary type, permanently lubricated with grease. The flange mounting is cast as an integral part of the case, and give, together with the foot bracket, plenty of opportunity for simple and robust installation.

- Power 0,2 kW, 0,4 kW, 0,6 kW, 0,9 kW & 1.2 kW
- ATEX certified
- Patented method for simple change of vanes
- Free speeds from 32 up to 10000 rpm
- Torque from 0,38 Nm up to 120 Nm by max output power
- Standard equipped with flange mounting
- Foot mountings as accessories

Origa System Plus

- Innovation from a proven design

A completely new generation of linear drives which can be simply and neatly integrated into any machine layout.

A NEW MODULAR LINEAR DRIVE SYSTEM

With this second generation linear drive Parker Origa offers design engineers complete flexibility. The well known ORIGA cylinder has been further developed into a combined linear actuator, guidance and control package. It forms the basis for the new, versatile ORIGA SYSTEM PLUS linear drive system.

All additional functions are designed into modular system components which replace the previous series of cylinders.

MOUNTING RAILS ON 3 SIDES

Mounting rails on 3 sides of the cylinder enable modular components such as linear guides, brakes, valves, magnetic switches etc. to be fitted to the cylinder itself. This solves many installation problems, especially where space is limited.

The modular system concept forms an ideal basis for additional customer-specific functions.

Magnetic piston as standard - for contactless position sensing on three sides of the cylinder.

Corrosion resistant steel outer sealing band and robust wiper system on the carrier for use in aggressive environments.

Proven corrosion resistant steel inner sealing band for optimum sealing and extremely low friction.

Combined clamping for inner and outer sealing band with dust cover.

Stainless steel screws optional.

Low friction piston seals for optimized running characteristics

Optimized cylinder profile for maximum stiffness and minimum weight. Integral air passages enable both air connections to be positioned at one end, if desired.

Install the OSP-P System to simplify design work! The files are compatible with all popular CAD systems and package hardware.

End cap can be rotated to any one of the four positions (before or after delivery) so that the air connection can be in any desired position.

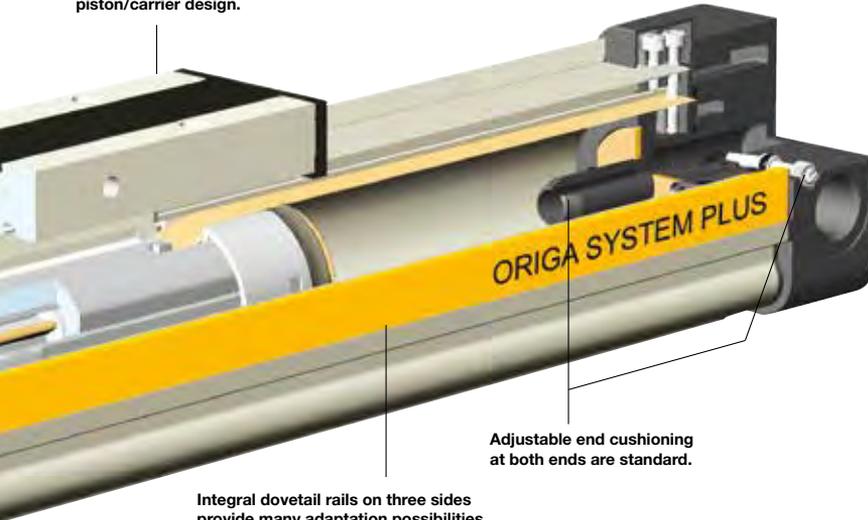

Clean Room Version
certified to DIN EN ISO 14644-1

Rodless Cylinder
for synchronized bi-parting movements

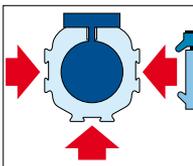

New low profile piston/carrier design.

Adjustable end cushioning at both ends are standard.

Integral dovetail rails on three sides provide many adaptation possibilities (linear guides, magnetic switches, etc.).

Modular system components are simply clamped on.

INTEGRATED VOE VALVES
The complete compact solution for optimal cylinder control.

SENSOFLEX SFI-plus
incremental measuring system with 0,1 (1,0) mm resolution.

BASIC GUIDE
Compact, robust plain bearing guide for medium loads.

SLIDELINE
Guide system for moderate loads. Optional with Active- / Passive Brake

POWERSLIDE
Roller guide for high loads and rough conditions

PROLINE
The compact aluminium roller guide for high loads and velocities. Optional with Active- / Passive-Brake.

STARLINE
Recirculating ball bearing guide for very high loads and precision.

KF GUIDE
Recirculating ball bearing guide – the mounting dimensions correspond to FESTO Type: DGPL-KF

HEAVY DUTY GUIDE HD
for heavy duty applications.

VARIABLE STOP VS
The variable stop provides simple stroke limitation.

PASSIVE BRAKE
reacts automatically to pressure failure.

ACTIVE BRAKE
pneumatic brake for secure, positive stopping at any position.

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

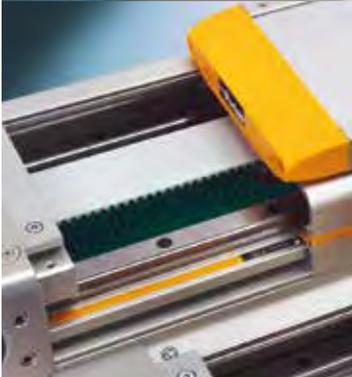

ORIGA HMR

High Moment Rodless Electric Linear Actuator - Three Drive Technologies: Screw, Toothed Belt, Linear Motor

Linear Drive *Driving the future*

The HMR linear drive system can be equipped with a “basic” or “reinforced” profile as standard. The “basic” profile is suitable for fitting directly to a machine base that has a corresponding support surface. The “reinforced” profile, on the other hand, is the preferred choice for self-supporting systems or for use in conjunction with a base surface offering limited support.

- Three alternative drive technologies in one profile
- Unique flexibility and reliability
- High speed and precision
- Two profile versions, four profile sizes
- Optional IP54 snap-in covers

ORIGA SYSTEM PLUS

OSP-P

Rodless Pneumatic Cylinders

Catalogue No: **P-A4P011GB**

- High service life $\geq 8,000$ km
- Low friction forces \geq high action forces
- Wide speed range (0,005 – 30m/s)
- Modular System – easy to mount guides, brakes and displacement measuring system

OSP-L

Pneumatic Linear Drives

Catalogue No: **P-A4P012GB**

- Completely modular design
- Compatible with the comprehensive ORIGA OSP system component range
- High loads and moments
- Space saving
- For a wide range of loads, speeds and motion profiles

OSP-E

Electric Linear Actuators

Catalogue No: **P-A4P017GB**

- For particularly high requirements regarding loads and forces
- For high-speed applications and highly dynamic motion profiles
- BHD with toothed belt and integrated heavy duty guide: roller guide or re-circulating ball bearing guide

HMR

Rodless Electric Linear Actuator

Catalogue No: **P-A4P024GB**

- 3 alternative drive technologies in one profile
- Unique flexibility and reliability
- High speed and precision
- 2 profile versions, 5 profile sizes
- Optional IP54 snap-in covers

For further information see: www.parker-origa.com

Origa Stop Cylinders

- Soft, rebound-free stopping of a conveyed load
- Flexible, for vertical or horizontal installation
- Types with shock adsorber/ roller lever combinations, lone roller or roller with a piston rod that ensures direct stoppage
- Shock adsorbers are easy to replace, even when fitted

Stainless Steel Air Motors - P1VS

- Power from 0,02 kW to 1,2 kW
- ATEX CE Ex approved from 0,12 kW to 1,2 kW
- No-lube intermittent operation as standard
- 0,2, 0,3 kW AND 1.2kW Brakemotors for higher safety

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

Rotary Actuators

Rotary Actuators - PRO / PRN

- Compact design
- Durable construction
- Long maintenance-free life
- High output torque/weight ratio
- Wide choice of torques available (up to 247 Nm)

Radial Piston Air Motors - P1V-P

- Power 0,73 kW, 0,125kW and 0,228kW
- Low speed and high torque
- Available as base and brake motors
- Free speed from 2200 down to 7,4 rpm
- High torque from 0,637Nm up to 500Nm

Vane Air Motors - P1V-A

- Designed for arduous applications.
- Wide range of optional gears
- Wide speed and torque range
- 1.6kW, 2.6kW, 3.6kW

Rotary Actuators - RA

- High torque
- Uniform torque in both directions
- Compact design
- 90° or 180° rotation
- Output shaft with key

Robust Air Motor - P1V-M

- Power from 0.20 kW to 1.20 kW
- Patented way for simple change of vanes
- ATEX CE Ex approved from 0,20 kW to 1,2 kW

Rotary Actuators - VRS / VRA

- Bores from Ø32 to 125mm with rotative angles of 96°, 186° and 366°
- Magnetic piston versions can be fitted with P8S sensors and brackets
- Operates with dry, lubricated or non lubricated air

Rotary Actuators - PV

- Double acting actuators
- Single or double vane
- Compact smooth design
- Uniform torque in both directions
- Angle adjustment and sensors available.

Vane Air Motors - P1V-B

- Power 5,1 kW, 9 kW and 18 kW
- For the very heavy applications
- Free speed of 6000 rpm

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

Actuators

Cylinders - P1G

- Ø6, 10 & 16mm Bore sizes
- Non-lube operation
- Corrosion resistant design
- Integral mounting thread
- Compact construction
- Single acting as standard.

Short Stroke Cylinders - C05

- Ø8 - 63mm bore sizes
- Short stroke providing high clamping force
- Compact dimensions for confined spaces
- Single and double acting
- Simple installation and mounting.

Stainless Steel ISO 6432 - P1S

- Mini - cylinders according to ISO 6432
- All stainless in 10 to 25 mm bores
- Magnetic piston as standard
- Double and single acting
- End stroke buffers for long service life

Stainless Steel ISO 6431 - P1S

- Round cylinder to ISO 6431
- All stainless steel
- Clean, smooth washdown design
- Magnetic piston as standard
- Adjustable cushioning for long service life
- Complete range of mountings and sensors

Thrust Cylinders - C0D / C0P

- Thrust cylinders provide large forces
- Compact dimensions
- C0D, diaphragm type
- C0P, piston type
- Available in single and double acting versions

Air Bellows - 9109 / SP

- 10 sizes, diameters 70 to 660 mm, Strokes from 20 to 410 mm, single, double or triple convolutions (removable type)
- 7 sizes, diameters 82 to 288 mm, Strokes from 55 to 170 mm, single or double convolutions (crimped type)
- High thrust and frictionless movement
- Maintenance free

Compact Cylinders - P5T

- Complete cylinder function with integral guidance
- Stainless steel guide rods
- Wide range of standard strokes, diameter 16-100 mm
- Flexible porting as standard
- End stop cushions as standard

Hydrochecks

- Range of imperial sizes
- Gives smooth control feeds
- Strokes up to 450mm

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

Valves

The Viking Lite valve range is robust, versatile and combines high performance with compact installation dimensions. Large flow capacity, short change-over times and low change-over pressure are important characteristics of this valve range.

- G1/8, G1/4 or G3/8 port sizes
- Low change-over pressure
- Wear compensating seal system
- Robust valve anodised aluminium valve body for maximum flow capacity and long life.
- Does not require lubrication in operation but can be installed in systems that are lubricated.

22mm Solenoid pilot options

Corrosion resistant design

The pilot operator body is manufactured in thermoplastic PA 6 material and the core tube brass/stainless steel. The plunger/core is made from stainless steel and the valve seats from FKM.

Solenoid Pilot Exhaust

These operators all exhaust out of the top of the core tube which is tapped M5. The standard solenoid nut fitted to the core tube is the Diffuser nut which allows the exhaust to escape to atmosphere. This nut also minimises ingress of dirt into the valve through this port. The alternative plastic knurled nut can be specified (refer to part number system) if the exhaust air needs to be captured and piped away using the M5 tapped port.

22mm solenoid operator part numbers and spares

Solenoid coils for 22mm solenoid operators

Voltage	Weight (Kg)	Order code Form B
12V 60Hz	0.093	P2FCB440

110V/50Hz, 120V/60Hz	0.093	P2FCB453
230V/50Hz, 230V/60Hz	0.093	P2FCB457

Spare Solenoid Nuts

Valves requiring captured exhaust should be fitted with plastic knurled nut

Order code
P2FNP

Valves with vented exhaust are fitted with diffuser plastic nut

Order Code
P2FND

Coils

Coils are wound with enameled copper wire, having temperature index 180°C with class F insulation (155°C) and are encapsulated in Thermoplastic resin.

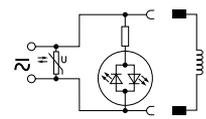

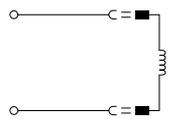

When fitted with suitable connector and correct gasket they give protection to IP65.

Manual Override options

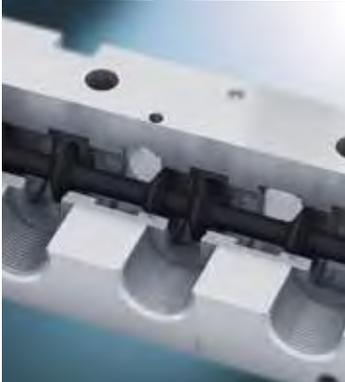

The standard manual override is the monostable (spring return) extended plastic override.

Solenoid Connectors / Cable Plugs EN175301-803

Viking Xtreme

High performance directional control valves

G1/8 - G1/2 body ported

Extreme Environments

*Demand The **Viking Xtreme***

The Viking Xtreme valve range is robust, versatile and combines high performance with compact installation dimensions. Large flow capacity, short change-over times and low change-over pressure are important characteristics of this valve range.

- 4 sizes: G1/8, G1/4, G3/8 and G1/2.
- Wide operating temperature range
- Compact design with good corrosion resistance.
- Wide range of 5/2 and 5/3 versions.
- High and low temperature versions available for transport applications.
- Lever operated version.

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

The compact design of these valves make them a popular choice for manual or mechanical operation and their modular construction permit different operators to be fitted to the actuator and return assemblies.

The Midget and Intermediate valves are designed to have balanced forces across the spool so that 3/2 valves can be piped normally open or normally closed by changing the inlet supply from port 1 to port 3.

- B 43 - 1/8" ported, B53 - 1/4 ported
- Manual and mechanical operation
- Stainless steel spools
- Viton seals
- 3/2, 5/2, 3/3 and 5/3 versions.
- Integral mounting holes

	5/3	Foot pedal pressurised centre position	Foot pedal self centring	18	B53004GZ

Accessories

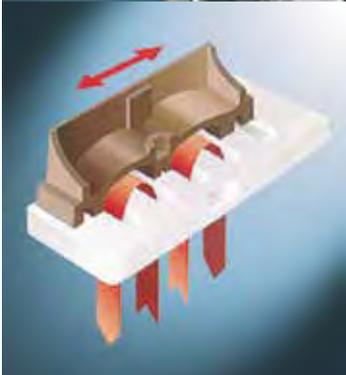

Foot guard kit **3117**

All 3/2 type B43 & B5/3 valves can be connected either as normally closed 3/2 valve (NC) or normally open 3/2 valve (NO) as required, by connecting the primary air supply to port 1 or port 3

DX Global ISO Valves

A complete range of pneumatic
ISO valves

Rust and corrosion resistant body

With the valve body in polyamide reinforced fiberglass and the casting in anodised aluminium, the Isomax range presents a comprehensive modern design to suit most industrial environments.

- ISO 15407-1 Sizes 02 & 01 and ISO 5599-1 Sizes 1, 2 & 3
- Ceramic technology for long life operation
- From vacuum up to 12 bar applications
- Internal or external pilot supply with same valves
- M12 on each coil
- Common M12

Ceramic slide valves for maximum operational life. Solenoid or air pilot actuation. Vacuum to 10 bar general applications.

- Size 01 and 02 (26 and 18 mm)
- Ceramic technology for long life operation
- From vacuum up to 10 bar applications
- Internal or external pilot supply with same valves
- Capture solenoid exhaust

Operation information	
Working pressure :	-0,9 to 10 bar
Working temperature :	-10 to +60°C
	DX02 DX01
Flow (Qmax.) :	630 l/min 1000 l/min
Flow (Qn) :	385 l/min 585 l/min

Heavy duty poppet valves 2/2 & 3/2 - G^{3/8}" & G^{1/2}"

These valves use the well proven poppet principle to give high flow rates with short valve travel, both the 2/2 and 3/2 valves in the range are available in G^{3/8}" and G^{1/2}" port sizes. This means that each actuator is available in four configurations i.e. 3/8" ports 2/2 or 3/2 and G^{1/2}" ports 2/2 or 3/2. All valves are normally closed.

The bodies are of block form construction for ease of mounting. Springs are stainless steel; internal seals being of nitrile rubber.

The 2/2 body allows air in one direction only, 3/2 versions having the facility of exhausting air through the actuator unit. This exhaust vent is unthreaded on all valves except the pilot and solenoid types which allows the piping away of exhaust air.

All mechanisms are spring returned.

Main data for mechanically operated valves, Heavy duty poppet series (NC only)

Rugged brass bodies with excellent corrosion resistance make these valves the ideal choice for arduous applications. Large and robust manual actuators are available together with air pilot actuators.

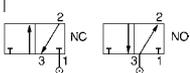

- Rugged valves for heavy duty applications
- Large and robust actuators for easy operation
- Excellent corrosion resistance
- Integral mounting holes
- Panel mounting versions

Moduflex Valve technology

Two technology platforms enable the compact design and high performance of the Moduflex Valve System.

The compact dual 4/2 and 3/2 valves utilize well proven Parker seal technology. The standard 4/2 valves adopt the long life super durable ceramic switching technology.

Materials

Valve body	Plastic
Spool	Aluminium and nitrile rubber or ceramic plate
Subbase or manifold	Plastic
End plates (T and V series)	Plastic
Fasteners	Nickel plated steel

Dual 4/2 valve

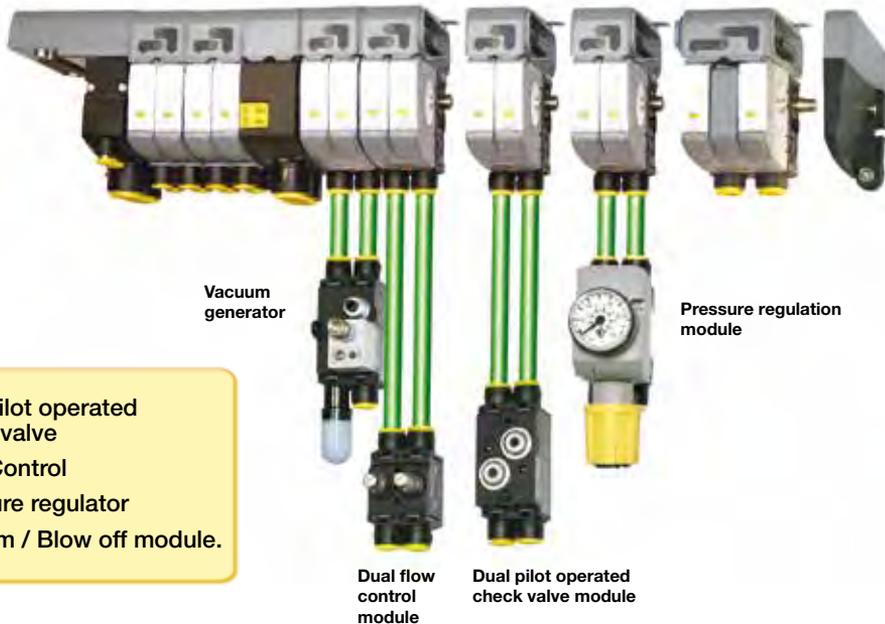

4/2 Valve

Moduflex Complete Control

With the introduction of the dual 4/2 size 1 valves, Moduflex now offers unrivaled ability of matching valves to exact flow requirements, ensuring cost and space are minimized. In addition, Moduflex Valve System offers all the necessary control peripherals to provide a complete automation solution. Moduflex is the complete control package.

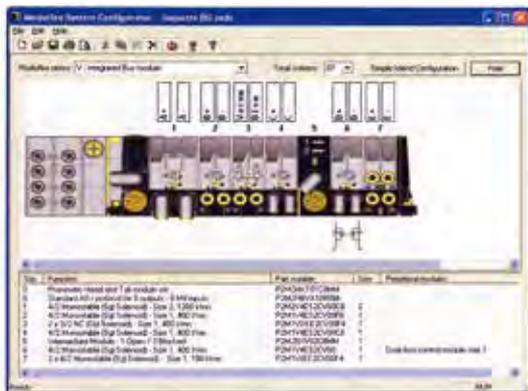

- Dual pilot operated check valve
- Flow Control
- Pressure regulator
- Vacuum / Blow off module.

Total ordering flexibility

Additionally to the complete product adaptability, the Moduflex Valve range offers for V, T, S and P series an ordering flexibility with 3 different designs; from all components separately ordered (basic module) to pre-assembled and tested valve island.

The Moduflex Valve Island Configurator software is the easy way to, step by step, configure and order the required valve island for the application.

Ordering options

1 - Basic modules ordering

Using this option, all basic components are separately ordered :

- Head and Tail set
- Valve modules
- Intermediate module kit
- Peripheral modules
- Pneumatic connectors, mufflers and plugs
- Electrical connection or fieldbus module

2 - Complete modules ordering

Using this option, modules are defined, ordered and supplied, pneumatic connectors and electrical connection equipped. One part number defines :

- Function module
- Pneumatic connectors, muffler and plugs
- Electrical connection and cable

3 - Pre-assembled valve islands ordering

Using this option, the complete valves island configuration has to be defined, and may be ordered, delivered fully assembly and tested under one part number.

V series

Integrated connection field bus or multi-connector valve island

T series

Individual connector valve islands
Solenoid clip or lockable connector or remote air pilot

S series

Stand alone valves
Solenoid clip or lockable connector or remote air pilot

P series

Peripheral modules
Flow control, check valves, pressure regulator, vacuum

Moduflex Valve in-line e-Configurator

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

The H Series Micro valve redefines flexibility for pneumatic users. When either configured from basic components or ordered as pre-assembled and tested valve islands, H Series Micro valves are the answer to all your needs.

- Up to 8 pneumatic functions on a 42mm width metal sub base
- 4 valve modules back to back for compact dimensions
- High performance
- Optimized flow for 6mm tubes
- Side or bottom mounted manifolds available.

Operating information

Fluid :	Air or inert gas Filtered 40 µ Class 5 (according to ISO 8573-1) Dry class 4 (according to ISO 8573-1) Non-lubricated or lubricated	Operating pressure :	-0.9 to 8,3 bar with external pressure 6 bar
Storage temperature :	-40 °C to + 70 °C	Piloting pressure :	2.7 to 8.3 bar
Working temperature	-15 °C to + 50°C	Exhaust collection :	Independant exhaust collection
Vibration :	according to IEC 68-2-6 2G to 150 Hz	Rated coil voltage :	24 VDC -15 % / +10 %
Shock :	according to IEC 68-2-27 15G 11 ms	Electrical connection:	Not polarised
		Coil insulation :	Class B
		Power consumption :	1 W (42 mA) with LED
		Duty factor :	100 % at 20°C

Plug-in valve

Electrical connection on subbase

Multifunction manual override caps

Caps for locking or condemned manual override

Back to back design

Up to 8 pneumatic functions in 42mm width

WCS metal spool

Wear Compensating System for 50 million cycles

Metal sub-base

Aluminium Die cast for maximum rigidity

Internal connection

Up to 32 solenoids

Auxiliary channels

Independant pilot pressure and exhausts

M7 thread

For 4 or 6 mm tube fitting

4 valves Side or Bottom ported sub-base

Up to 4 pneumatic modules

The H Series Micro valve redefines flexibility for pneumatic users. When either configured from basic components or ordered as pre-assembled and tested valve islands, H Series Micro valves are the answer to all your needs.

Solenoid operated Valve fitted with 24 VDC solenoids

Plug-in valves

42 mm only for 4 valve modules

- Up to **8 pneumatic functions** on a **42 mm width** metal sub-base manifold.
- 4 valve modules **back to back** mounted for a compact design.
- Optimized flow with 6 mm OD tube allows 0,5 m/s speed on a 50 mm diameter cylinder with 1/4 fittings.

Optimized flow for a 6 mm OD tube

Qn = 282 NI/mn Qmax = 510 NI/mn

Side ported manifold design

- Manifold with common ducts for ports 1, 3 and 5, outlet port 2 and 4, and supply port for 12 and 14 are available side ported.

Bottom ported manifold design

- A bottom ported design for an easy integration into an enclosure.

An easy man-machine dialogue

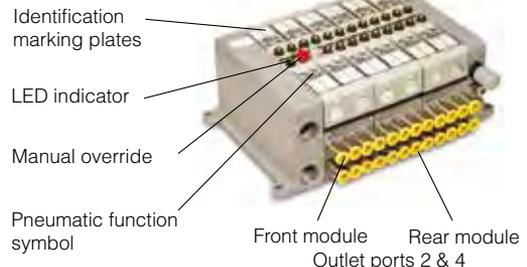

• **Multifunction manual override**

Standard non-locking manual overrides can be easily changed to locking or blocked with accessories available with valves.

• **Customer identification**

Have your own identification on the product protected with a transparent flip-up cover.

A quick visual diagnostic face

Island with multi-pole connection

In a decentralized application, when a multi-pole connection is required, the valve island head module can be equipped with a standard Sub-D25 connector.

With this Sub-D25 connection, up to 24 solenoid valves can be piloted.

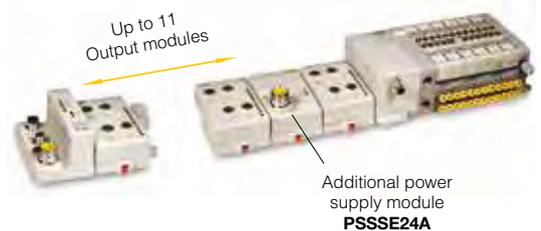

Up to 32 solenoid valves

Communication modules include a main 24 VDC power supply for the bus and the 32 output driver modules. All solenoids can be energized at the same time.

Up to 256 electrical outputs including 32 solenoid valves

Communication modules include a main 24 VDC power supply for the Bus and up to 10 digital or analogical output modules. Additional power supply is only requested if there are more than 11 output modules.

Island for fieldbus communication in decentralized application

In a decentralized application where a serial communication is required and only a few valves are necessary, different fieldbus protocol modules are also available.

In that case, the valve island has to be equipped with a bus communication head module adaptor.

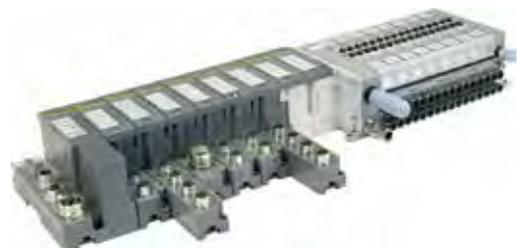

Depending on the protocol, the head module can pilot up to 16 solenoid valves.

Island up to 16 or 32 solenoid valves linked to the Turck BL67 remote I/O device series

This electro-mechanical interface allows, with its modularity up to 16 or 32 solenoid valves, an inter-connection to the TURCK BL67 Series, offering a wide choice of industrial communication with Field bus and Industrial Ethernet protocols and a complete range of electrical I/O modules.

Parker 7321B/7322B are diaphragm pilot operated solenoid valves and require a minimum differential pressure to operate.

This series is available in both Normally Closed and Normally Open function: 7321B Serie is a Normally Closed family (closed when de-energised), 7322B Serie is the Normally Open family (Open when de-energised).

- Pilot operated solenoid valve
- Exclusive diaphragm design
- For water, steam, light oils
- High flow rate
- Fast reaction time
- Easy and quick maintenance

Operating information

Valve body:	CW617N UNI EN 12165:98 Forged Brass
Enclosing tube:	AISI 304 stainless steel
Plunger:	AISI 430F St. Steel
Spring:	AISI 302 St. Steel
Seals:	NBR (Buna N) - EPDM FKM (Viton)
Shading ring:	Copper

Installation

The valves can be mounted in any position. It is however recommended to install them with the coil in vertical position above the body.

Media

These valves have been developed to achieve the best performances for water, steam, light oils (up to 2°E). Therefore these valves are not usable with gas and air.

We recommend to choose NBR versions for plumbing mkt (max. temp. 90°C), FKM version for water/light oils control applications up to 140°C, EPDM version for superheated water and steam (up to 140°C)

Please consult factory in case you need to verify the compatibility of 7321B/7322B Series with alternative ranges of paper FCDE coils not included in this catalogue.

2/2 Normally Closed - BSP threads

Control Devices & Vacuum

Interface Valves - PS1

- High speed poppet type valves
- 3/2 & 4/2 Electro-pneumatic modules
- Push-in connections Ø4mm & Ø6mm
- High performance 15mm solenoids
- Building block type modules with DIN rail mounting

B Valves

- High performance industrial valves
- G1/8 or G1/4 body ported
- 5/2 and 5/3 configurations
- All metal rugged construction
- Wear Compensating Seal system
- IEM manifolds
- Low power solenoids

Valve Island - PVL-B10

- Compact lightweight, high flow valves
- 2 x 3/2, 5/2 or 5/3 configuration
- Push-in Ø6mm or G1/8 threaded connections
- High performance 15mm solenoids
- Stacking type modules with DIN rail mounting

Inline and Stackable Valves - PVL

- 3 sizes: G1/8 or G1/4 versions
- Ultra light weight
- Inline stand alone or stackable versions
- Push-in or threaded connections
- Low consumption solenoids.
- DIN rail or block mounting

Logic Control

- Complete range of logic processing modules
- Stand alone or stackable and combinable units
- Ultra fast response times
- Visual indication
- DIN rail mounting.

Two Hand Control Units - PXP

- Ergonomic design
- Robust polymer or metal enclosure
- Meets requirements for protection against accidental operation and tampering
- Conforms to EN574 and EN954-1 requirements

Adex Valves

- Miniature high flow body ported & manifold valves
- 5/2 and 5/3 configurations
- Ultra fast response times
- 10mm & 15mm body widths
- Threaded or push-in connection
- Single sub-base or IEM manifolds

Vacuum

- Mini vacuum generators
- Compact "air saver" vacuum generators
- Multi-function vacuum generators with holding
- Valve and rapid release options
- Wide range of suction cups
- Wide range materials

For more information see - Parker Pneumatic Catalogue PDE2600PNUK

Fluid Controls

2/2 - Way Shut-Off Valves for Air

- 1/4" - 2" pipe mount
- Pressure range up to 40 bar
- Normally open and normally closed
- Direct or servo-acting
- Long life expectancy, highest reliability
- Manual override optional
- Excellent response time
- Can be mounted with Lucifer® coil families

Proportional Pressure Regulator

- 1/4" - 2" pipe mount
- Lucifer® Programmable EPP4 all parameters fully adjustable through the PC software calys
- Low power consumption (2.2W), energy savings
- High responsiveness and low hysteresis (0.5%)
- Flexible remote display

3/2 - Way Valves for Air

- 1/8" - 1/4" pipe mount and flange version
- Pressure range up to 30 bar
- Normally open and normally closed, universal
- Long life expectancy - highest reliability
- Excellent response time repeatability
- Can be mounted with Lucifer® coil families

3/2 - 5/2 NAMUR Valves

- 1/4" & 1/2" NAMUR interface
- Patented NAMUR conversion plate
- Highflow Qn: 3000 L/min
- Solenoid or pneumatic version
- High resistance aluminum
- ATEX Zone 22 certified products
- Fast switching application

EExPress Bus Manifold for ATEX

- EExPress™ is a stackable system that includes Gateway, Input sensor modules and 5/2 way solenoid valve modules
- EExPress™ uses the well known Profibus DP protocol
- IP65 - no cabinet needed
- Zone 1, 2, 21 and 22 protection
- It has been designed to approach a "plug and play" usage

Standard, ATEX and IECEx Coils

- Modular concept for dedicated valves
- D / B Terminal Standard
- Various AC / DC voltages
- Various IP65-IP67, 100% ED
- Meet latest international & national codes
- ATEX Zone 0, 1, 2, 20, 21, 22 - Protection ia, ib, dm, d, e, m, me, n

Solenoid Valves for Fluid Control Applications

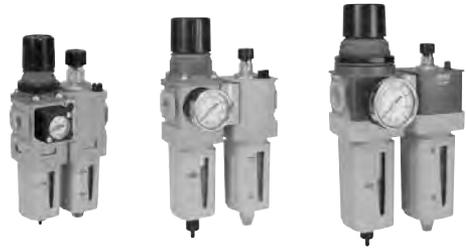

Fluid Control products have been designed to offer customers the ultimate in performance. Every valve is engineered for optimal operation, is constructed with modern machinery that use stringent processes, and provides standard features not necessarily offered in any competitive line. The Fluid Control Series portfolio offers a broad range of 2/2, 3/2 and 5/2 solenoid valves. Sizes range from 1/8" to 3", with Kv as high as 3000 L/min. Pressure capabilities range up to 200 bar; the whole range is available with various seal materials, such as NBR, FKM, EPDM, PTFE, PCTFE, PUR and Ruby. Brass, Aluminum, stainless steel and plastic valves are available.

For more information see - www.parker.com/fcdc

Air Preparation & Airline Accessories

- High flow modular air-preparation series
- Space saving integral gauge (P31 size only)
- Manifold style regulators available
- OSHA compliant shut-off valves

Description	Order Code
Wall Mount Kit - standard	P3SKA00MW
Wall Mount Kit for common p1 regulator	P3SKA00MB
Assembly Kit	P3SKA00CB
Branch manifold, 3 x G1/8, 1 x G1/4 for pressure switch incl. assembly material	P3SMA1V0N
Gauge Ø 40, 0-10 bar, G1/8	KZ8813-00
Lock for tamperproof regulator	P3XKA00AS

Nano Mist

Simple. Convincing in the Details

*There are innovations that bring selective improvements.
And then there are real innovations.
Innovations that set **new** standards.
Like the **new Parker Moduflex Lite** series.*

New Nano Mist Technology, New Lubricator Concept. Self-Adjusting.

With conventional lubricators, only the oil volume per time unit can be adjusted. If the demand changes, the quantity dispensed still remains constant.

The Moduflex Lite lubricator concept sets new benchmarks here. For the first time, the oil volume is automatically adjusted to the flow rate.

This ensures that there is neither too little nor too much oil in the system, which leads to clear economic and ecological advantages. In addition, with conventional systems, the distance between the lubricator and the equipment has to be less than 8 meters. With larger distances, the dispensed oil is deposited as a wall flow.

The new lubricator principle of the Moduflex Lite allows for distances of up to 40 meters. This opens up new scope for the design of even more efficient production systems.

- Integral 1/2 or 3/4 ports
- High efficiency 5 micron element as standard
- Excellent water removal efficiency
- Secondary pressure ranges 4, 8 and 16 bar
- Rolling diaphragm for extended life
- Secondary aspiration plus balanced poppet provides quick response and accurate pressure regulation.
- Low temperature -40°C with Regulators/Filters and Filter Regulators using combined manual/semi auto drain as standard without pressure gauge.

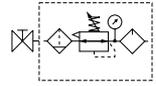

Operating information		Flow characteristics		
Working pressure:	Max 16 bar	Flow dm³/s	1/2	3/4

Accessories

Description	Order code
Connector kit	P3XKA00CB
Connector O'ring kit (5)	P3XKA04CY
Tamper-proof knob kit (keylock)	P3XKA00AS
Wall bracket kit	P3XKA00MW
Panel mount nut	P3XKA00MM

- Integral 3/4 or 1" ports (BSPP or NPT)
- High efficiency element as standard
- Excellent water removal efficiency
- Robust but lightweight aluminium construction
- Secondary pressure ranges 12 and 16 bar
- Rolling diaphragm for extended life
- Secondary aspiration plus balanced poppet provides quick response and accurate pressure regulation.
- Low temperature -40°C with Regulators/Filters and Filter Regulators using combined manual/semi auto drain as standard without pressure gauge.

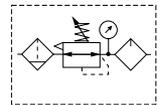

Operating information		Flow characteristics

The all metal P3Z Series FRLs are ideal for most medium sized ring main installations.

- Self relieving feature plus balanced poppet provides quick response and accurate pressure regulation.
- Threaded port flange available to G1-1/2" and G2"
- Proportional oil delivery over a wide range of air flows.

Operating information

Working pressure: 0 - 17.5 bar
 Working temperature: 0 °C to +60 °C

Flow characteristics

Flow Filter >666,6 dm³/s
 Regulator >666,6 dm³/s
 Lubricator >666,6 dm³/s

The range of Stainless Steel FRLs are ideal for use in the food industry, the petrochemical or process industries or any application in a particularly harsh or aggressive environment.

- Suitable for Marine & Offshore applications
- Chemical / Petroleum and process industries
- Coalescing filters are designed for removing oil and water aerosols down to 0.01 μ
- Suitable for food industry applications

Operating information

Max operating pressure	20 bar
	12 bar when fitted with auto-drain
Max operating temperature	Regulator 65°C
	Filter + Regulator 80°C,
	50°C when fitted with auto-drain

Plug can be turned 90°

Protective cap can be turned 6 x 60°

Dimensions in mm

Quick Exhaust Valves

- Increases piston speeds, super sensitive diaphragm.
- May be used as differential shuttle valve.

Shuttle Valves

- Allows two separate signals to be applied to the air pilot.
- 0,6 bar differential, Viton seals as standard.

Non Return Valves

- Aluminium or polymer bodies
- Compact

Operating information

- All plastic ultra light weight versions
- Sintered metal
- All metal versions for heavy duty applications
- Versions with push-in connections
- High noise level reduction
- Low back pressure generation
- Restrictor silencers screw adjustment

Operating and additional information

Plastic Working temperature: -10°C to +80°C
Efficiency 92%

Metal Working temperature: -10°C to +74°C

Working pressure up to 17 bar

**Protect your most important assets:
your employees and their equipment!**

The AirGuard offers simple but efficient protection to pneumatic systems in the event of a broken compressed-air hose or pipe. The air supply is immediately shut off by the AirGuard, should the volume of air exceed a set value. This "value" is factory preset and is set to allow normal air consumption when using air tools.

Should the air consumption exceeds the set value, e.g. the air line is severed, then the internal piston instantly shuts off the main flow. An integral bleed hole allows some air to flow through. This enables the line pressure to automatically reset the AirGuard once the main line break is repaired.

Management Responsibility:

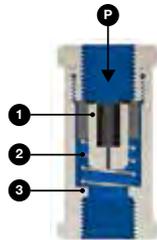

It is the duty of management to ensure a safe working environment for their employees and that the equipment complies with **ISO 4414** or **"PUWER"** (the Provision and Use of Work Equipment Regulations)

Complies with the 2010 ISO4414 (5.4.5.11.1)

"When failure of a hose assembly or plastic piping constitutes a whiplash hazard, it shall be restrained or shielded by suitable means. In addition, an air fuse for compressed air should be mounted."

Function:

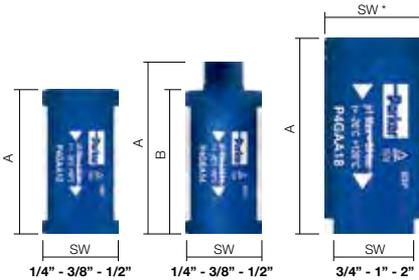

(P) is the inlet. The air flows over piston (1) and continues through seat (3). The flow of air over the piston is slowed down by several longitudinal grooves on the exterior of the piston. If the flow becomes excessive, the current of air cannot flow over the piston quickly enough. The piston is then pressed against spring (2) beneath it, and towards the seat. If the flow is exceeded, for example, if the hose suddenly breaks, the air supply is automatically shut off.

Special Applications

Stainless Steel AirGuard available in 1/2" size

Some branches of industry with a high hazard potential, such as chemical and pharmaceutical as well as clean room and offshore technologies place extremely high demands on both the safety of their employees and the protection of their facilities. Compressed air is typically used as an energy transfer medium in these industries and is no means without its dangers: compressed air hoses can rupture or burst, as can fixed pipes. This may expose personnel working in such areas to extreme hazards as well as potential damage to expensive facilities and costly production downtime.

CONNECTIC Solutions for Compressed Air

Legris LF3000 Instant Fittings

- Brass / polymer fittings for standard applications.
- Instant connection/disconnection.
- Full flow, automatic sealing.
- Vacuum capability.
- Compact & aesthetic, lightweight.
- Very extensive range.
- -20°C to 80°C, maximum 20 bar (depending on fitting type and OD).

Legris Tubing

- Standard tubing made of PA, PU, FEP 140, and PE.
- PA and PU hoses in 7 colours.
- Multi, twin and spiral; anti-spark, anti-static.
- 25 or 100 m rolls in Tubepack® box.
- Large pack on drum.
- Hoses made of braided PVC.
- Self-fastening hoses.

Legris LF3600 Instant Fittings

- Nickel-plated brass instant fittings for demanding applications.
- For air and fluid transportation.
- FDA, 1935/2004/CE.
- -20°C to 150°C at 30 bars.
- Wide range.
- Compact & robust design.

Legris Universal Compression Fittings

- Brass or stainless steel (316L).
- Withstand high temperatures and pressures (max. 80 bars, 250°C).
- Resistant to aggressive and corrosive environments.
- A large range for many applications.
- Many accessories.

Legris LF3900/3800 Instant Fittings

- Stainless steel 316L fittings for severe conditions.
- Hygienic design.
- Extreme chemical and mechanical resistance.
- Fittings suitable for permanent food contact (FKM seals in accordance with FDA and 1935/2004/CE directives).
- Wide range: 21 shapes, diameters 4 to 12 mm.

Legris Ball Valves / Axial Valves

- Nickel-plated brass.
- Optimum sealing & excellent resistance.
- -20°C to 80°C, 20 to 40 bar (depending on the model).

Legris Function Fittings

- Flow control regulators, blocking fittings, mini-ball valves, non-return valves, silencers...
- Used on pneumatic devices in many industrial applications: factory automation, packaging, multi-purpose robots, material handling, textile, printing, auto process, machine tools.
- 0°C to 70°C, from 1 to 10 bars (depending on fitting type).

Safety Couplers / Blowguns / Accessories

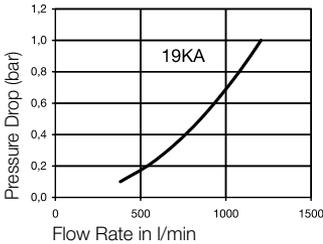

- Couplers:**
 - Comply with ISO 4414 and EN983 safety standards 0 - 16 bar, -20°C to 60°C.
- Blowguns:**
 - Two connection points. Comply with OSHA and EU regulation for safe use. Up to 10 bar, -15°C to +60°C.
- Accessories:**
 - Full nickel-plated range.

Rectus Series 19KA - DN 5.5

English industrial profile with UltraFlo technology. Compact dimensions. Robust coupling for compressed air applications. The steel sleeve counters oscillating forces.

Chart / Air

Advantages

- Single handed operation
- Plug design optimised through greater insert depth
- UltraFlo technology with high flow valve

Working Pressure

PB = 35 bar, maximum static working pressure with safety factor of 4 to 1.

Working Temperature*

-20°C up to +100°C (NBR) depending on the medium.
*At a temperature below -20°C and above +100°C special seals are available on request.

Rectus Series 126KA - DN 7.2

Universal brass coupling with European standard industrial profile. Coupling system with single-handed operation and standard-valve. Series 26 plugs in brass. Series 25 steel plugs recommended for oscillating forces.

Chart / Air

Advantages

- Compact outer dimension
- High working pressure
- Optimized flow rate

Working Pressure

PB = 40 bar, maximum static working pressure with safety factor of 4 to 1.

Rectus Self-Venting Series 26KE - DN 7.4

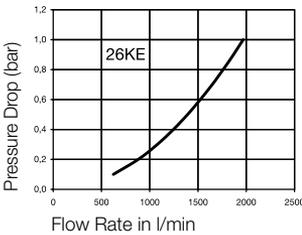

The connection is made the same way as with all other quick connect coupling series, by simply pushing the plug in the coupling. The audible latching when the plug is securely in place signifies that the coupling is locked. The sleeve must be pulled back to release the first locking system before it can be disconnected. This closes the coupling valve. The compressed downstream air can now escape from the plug (hose). Pulling the sleeve back a second time releases the second locking system. The connection can now be safely undone. This self-venting coupling is designed for bleeding off trapped air.

Advantages

- The system fulfils the requirements of ISO 4414
- increased safety standards in the work place
 - the plastic sleeve does not scratch working surfaces

Chart / Air

Caution

Not recommended for direct connection to compressed air tools. Reliable functioning can only be guaranteed in conjunction with original Parker Rectus plugs made of steel.

Working Pressure

PB = 12 bar, maximum static working pressure with safety factor of 4 to 1.

Working Temperature*

-20°C up to +60°C (NBR)
depending on the medium.
*At a temperature below -20°C and above +60°C special seals are available on request.

Rectus Self-Venting Series 1600KE - DN 7.8

The 1600KE series is a safety coupling with a self-venting system. When the sleeve is pulled back, the plug is released yet remains locked in. The coupling valve closes. The compressed air can now escape from the plug (hose). By operating the sleeve again in the direction of the plug, the second locking system is released. Only now can the connection be disengaged.

Chart / Air

Advantages

The system is compliant with the requirements of ISO 4414, DIN EN 983.

- increased safety standards in the work place
- High flow performance combined with compact design.

Caution

Not recommended for direct connection to compressed air tools. Reliable functioning can only be guaranteed in conjunction with original Parker Rectus plugs made of steel.

Working Pressure

PB = 2 up to 12 bar, maximum static working pressure with safety factor of 4 to 1.

Working Temperature*

The Parker Pneumatic Catalogue

For the complete range of pneumatic system components, refer to the Parker Pneumatic Catalogue PDE2600PNUK

Parker is the world leader in motion and control technologies, providing systematic, precision-engineered solutions for a wide variety of, industrial markets. Throughout the world, Parker Hannifin is working together with companies to make their machines more reliable and more productive. Parker products are in operation on satellites orbiting the earth: in machine tools and mobile plant; on oil rigs and refineries; in hospitals and laboratories. In fact, wherever there are machines that depend on motion or fluid control, you will find innovative and reliable Parker components and systems.

The Parker Pneumatic catalogue is a comprehensive guide to products from Pneumatic Division Europe, Legris, Rectus, Fluidconnectors, KV and Fluid Controls, presenting an unrivalled choice of products and solutions to suit virtually any application. Also included is a technical CD containing further products and catalogue availability.

Viking Lite

Available in boxed quantities of 25

The Viking Lite valve is available in boxed quantities of 25 combines high performance with compact installation dimensions. Large flow capacity, short change-over times and low change-over pressure are important characteristics of this valve range.

5/2 valves, internal air, standard temperature

Size	Actuation	Return	Order code	Order code
			Without solenoid	With 24V DC (22mm coil)
G1/8	Electric	Electric	P2LAZ511EENDCNQ25	P2LAZ511EENDCB49Q25
G1/4	signal	signal	P2LBZ512EENDCNQ25	P2LBZ512EENDCB49Q25
G1/8	Electric	Spring	P2LAZ511ESNDCNQ25	P2LAZ511ESNDCB49Q25
G1/4	signal		P2LBZ512ESNDCNQ25	P2LBZ512ESNDCB49Q25

For detailed operating information - Refer to page 44

P3L - Lite Series Air Preparation System

Available in boxed quantities of 25

- Compact body ported units
- Port size G1/4
- Unique deflector plate ensuring maximum water and particulate removal
- Solid control piston with lip seal for extended life.
- Proportional oil delivery over a wide range of air flows.

Filter/Regulator + Lubricator Combination

Port size	Description	Order Code
G1/4	Manual push drain	P3LCA12PEPNGLNWQ25
G1/4	Semi auto drain	P3LCA12PESNGLNWQ25

For detailed operating information - Refer to page 88

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374.

AEROSPACE

Key Markets

- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missiles & launch vehicles
- Regional transports
- Unmanned aerial vehicles

Key Products

- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Wheels & brakes

CLIMATE CONTROL

Key Markets

- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Processing
- Transportation

Key Products

- CO₂ controls
- Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors
- Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

ELECTROMECHANICAL

Key Markets

- Aerospace
- Factory automation
- Food & beverage
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

Key Products

- AC/DC drives & systems
- Electric actuators
- Controllers
- Gantry robots
- Gearheads
- Human machine interfaces
- Industrial PCs
- Inverters
- Linear motors, slides and stages
- Precision stages
- Stepper motors
- Servo motors, drives & controls
- Structural extrusions

FILTRATION

Key Markets

- Food & beverage
- Industrial machinery
- Life sciences
- Marine
- Mobile equipment
- Oil & gas
- Power generation
- Process
- Transportation

Key Products

- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

FLUID & GAS HANDLING

Key Markets

- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile
- Oil & gas
- Transportation
- Welding

Key Products

- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose
- PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

HYDRAULICS

Key Markets

- Aerospace
- Aerial lift
- Agriculture
- Construction machinery
- Forestry
- Industrial machinery
- Mining
- Oil & gas
- Power generation & energy
- Truck hydraulics

Key Products

- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls
- Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

PNEUMATICS

Key Markets

- Aerospace
- Conveyor & material handling
- Factory automation
- Food & beverage
- Life science & medical
- Machine tools
- Packaging machinery
- Transportation & automotive

Key Products

- Air preparation
- Compact cylinders
- Field bus valve systems
- Grippers
- Guided cylinders
- Manifolds
- Miniature fluidics
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves and controls
- Rodless cylinders
- Rotary actuators
- Tie rod cylinders
- Vacuum generators, cups & sensors

PROCESS CONTROL

Key Markets

- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Microelectronics
- Oil & gas
- Power generation

Key Products

- Analytical sample conditioning products & systems
- Fluoropolymer chemical delivery fittings, valves & pumps
- High purity gas delivery fittings, valves & regulators
- Instrumentation fittings, valves & regulators
- Medium pressure fittings & valves
- Process control manifolds

SEALING & SHIELDING

Key Markets

- Aerospace
- Chemical processing
- Consumer
- Energy, oil & gas
- Fluid power
- General industrial
- Information technology
- Life sciences
- Military
- Semiconductor
- Telecommunications
- Transportation

Key Products

- Dynamic seals
- Elastomeric o-rings
- EMI shielding
- Extruded & precision-cut, fabricated elastomeric seals
- Homogeneous & inserted elastomeric shapes
- High temperature metal seals
- Metal & plastic retained composite seals
- Thermal management
